Education

G Madegowda Institute of Technology, Mandya, Karnataka 2024 - Expected 2028
Bachelor of Engineering, Computer Science and Engineering | Affiliated to VTU | CGPA: 7.71

Professional Experience

GlowLogics Solutions May 2026 – Aug 2026
Artificial Intelligence Internship

- Completed AI/ML training and submitted five Streamlit-based prototypes: fraud detection, dynamic pricing, medical image classification, demand forecasting and a PDF RAG chatbot.
- Practised Python, NumPy, Pandas, data visualization, ML workflows and model evaluation through projects and case studies.

Crystallize Technologies Mar 2026 – Jun 2026
Front-End Development Technical Training

- Completed a 12-week college Skill Enhancement Program in HTML, CSS and JavaScript; developed InterestVerse, a gamified community platform.

Inner Voice & CADD Academy Oct 2025 – Jan 2026
Python Training

- Completed 14 weeks of weekly Python training through a college Placement Assistance Program.

Projects

Ask My PDF Bot (RAG) | *Python, Streamlit* Live | GitHub

- Built a PDF question-answering prototype: PyMuPDF text extraction, chunking, SentenceTransformer embeddings, FAISS retrieval, and answers via Gemini or an extractive fallback.
- Shows retrieved source and page information so answers can be traced to the uploaded document.

Campus Transport Management System | *Python, Flask, SQLite, JavaScript* GitHub

- Developed a Flask dashboard for simulated bus coordinates, traffic status and delay estimates, with SQLite-based data management.
- Implemented overspeed, accident and breakdown alert simulations; tracking is simulated and does not use live GPS hardware.

CodexQuest: Gamified Coding Platform | *HTML, CSS, JavaScript, Monaco Editor* Live | GitHub

- Built a responsive RPG-inspired interface with coding worlds, quests, XP and levels, badges, a leaderboard and a profile dashboard.
- Created interactive quest views with an embedded Monaco code editor; a front-end prototype using sample data, with no backend.

InterestVerse: Community Platform | *HTML, CSS, JavaScript* Live | GitHub

- Developed a web platform concept with interactive community, profile and engagement UI during college technical training.

Machine Learning Prototypes | *Python, Streamlit, XGBoost, TensorFlow/Keras*

- Built internship prototypes for fraud-risk scoring, dynamic pricing, demand forecasting and medical-image classification using Python and Streamlit on synthetic/demo datasets.
- Applied class-imbalance handling, threshold optimisation and SHAP explainability for fraud detection, alongside regression metrics for demand forecasting.

Skills & Certifications

Programming and Web: Python, JavaScript, HTML5, CSS3, SQL (basic)

Frameworks and Libraries: Flask, Streamlit, Jinja2, Pandas, NumPy, Matplotlib, Scikit-learn, XGBoost, TensorFlow/Keras, SentenceTransformers, FAISS

Data and AI: Data cleaning, EDA, visualization, regression, classification, clustering, model evaluation, CNN fundamentals, RAG

Tools and Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, GitHub Pages, SQLite

Certifications: freeCodeCamp Python Developer (Sep 2026, approx. 300 hours); HackerRank Frontend Developer, React (Jul 2026); Kaggle Intro to Machine Learning and Intro to Deep Learning (Sep 2026); Be10X AI Tools and ChatGPT Workshop (Jun 2026); EF SET English C1 Advanced, 68/100 (Sep 2025).

Achievements & Organizations

- **Second place,** "Decode the Clues, Discover the Treasure", Tech Fest 2K25, P.E.S. College of Engineering, Mandya (Dec 2025).
- **Product Lead and pitch presenter,** FocusFlow: Where Focus Becomes Currency, IDEARUSH 1.0 8-hour ideathon (Apr 2026).
- **Participant,** RRCE Ideathon 2026, presented an idea with Team INFRAMIND (May 2026).
